

About our company's response to the COVID-19.

Des.08.2020

I would like to extend my heartfelt sympathy to those who are facing difficulties due to the spread of the COVID-19 infection.

As a measure to prevent the spread of the infection, we will provide the following information.

We operate based on the guidelines of "Infectious Prevention Measures, Incidents, and Business Continuity". This is what the Ministry of Agriculture, Forestry and Fisheries shows about food business operators.

We are thoroughly managing the health of our employees. And, we also control the spread of infection by the flow of people through strict hygiene management when entering and leaving the processing room.

Regarding shipping and processing work, hygiene management is thoroughly performed at the HACCP-certified processing room.

In addition, regarding the PCR self-examination conducted by the Toyosu Market Association, all of our employees tested, and all of them were negative.

Our company will continue to work to prevent the spread of infection.

We apologize for any inconvenience this may cause, but we appreciate your understanding and cooperation.
